

Dear FCC Commissioners:

Please do not vote in favor of this continued media ownership concentration.

We are at a dangerous crossroads in our country's history. It is obvious to many Americans what has happened to the media starting in the mid-80s.

The American public wants true unbridled journalism. The last sacred element of our nation is the First Amendment...and this looks like a clear erosion of that sacred right.

There are some vital commodities that NEED regulation...public transportation, utilities, financial institutions....and most importantly, the media. To allow greater influence of Clear Channel, Rupert Murdoch and Univision would be a grave error. Please do not proceed with the further trashing of the First Amendment by concentrating ownership. There must be more locally produced news and programming. It is a scary proposition to have the bulk of news coming from a few media giants.

I would not want to get all our news from the Disney corporation, or the Wall St Journal or the NY Times. To get the truth in journalism, there needs to be healthy investigation from competitive sources.

What is proposed is anti-competitive. There needs to be anti-trust legislation in this and other areas.
